

Kick Off

- The new plan must show early progress
- Plan the tasks so that delivery of at least one major milestone follows quickly
- At the project kick off demonstrate the learnings from the previous project difficulties
- Display the confidence to achieve your goals
- Maintain the momentum

Demonstrate Early Success

Demonstrating success early is important because:

- Stakeholders will have confidence in the new plan
- The project team will gain confidence in their ability to deliver
- You can demonstrate control to all concerned
- When a milestone is reached – congratulate and communicate
